SUMMARY

I am a motivated and detail-oriented Software Engineer with a strong foundation in software development and modern technologies. I am passionate about building scalable solutions and contributing to impactful projects while continuously improving my technical and problem-solving skills in a professional environment

EXPERIENCE

Freelance Web Developer

Fiverr

2023 - 2025

- Worked with international clients on small web development and website maintenance projects.
- Developed simple websites and performed updates using HTML, CSS, JavaScript, and basic React components.
- Earned payments in USD through freelance platforms while gaining practical experience in client communication, debugging, and feature implementation.

Software Engineering Intern

Pangea Global Enterprises (PGE)

06/2025 - 08/2025 Lahore, Pakistan

A global enterprise specializing in digital solutions and consulting

- Developed and maintained web applications using HTML/CSS/JS, React/Python, contributing to functional and user-friendly websites
- Gained practical exposure to UI/UX principles while working in a collaborative, professional development environment

Full stack Developer (Project-Based)

Rathisoft Innovation

09/2025 - 01/2026 Lahore, Pakistan

An innovation-driven tech company focusing on software development

- Designed and developed a complete website as part of a project-based engagement, delivering all required features within the defined timeline
- Implemented responsive UI and core functionality using modern web technologies, ensuring usability and performance

PROJECTS

AI-Based Content Recommendation System

- Built a cross-platform Flutter application providing personalized video, music, and movie recommendations from YouTube, Spotify, and TMDB
- Implemented AI-powered mood detection for intelligent content suggestions and features such as AI chat interface, viewing history, Favorites system, and real-time Firebase synchronization

TripsAdora – Travel Booking & Management System

- Developed a large-scale, multi-platform travel booking system with separate Supplier, Customer, and Admin platforms
- Built RESTful APIs using FastAPI & MongoDB and frontend applications using React, and Tailwind CSS

EDUCATION
